EDUCATION

Simon Fraser University

Bachelor of Computing Science

Burnaby, BC

Current – Dec. 2027 (Expected)

Thompson Rivers University

Computing Science Diploma – GPA: 3.85/4.33, Dean's List

Kamloops, BC

May. 2025

INDUSTRY EXPERIENCE

Royal Bank of Canada (RBC)

May – Aug. 2026

Automation Engineer Co-op

Vancouver, BC

- **MAD Award recipient** – recognized for independently owning and delivering three automation initiatives that improved efficiency, compliance, and resource utilization across RBC's Global Security IAM team.
- Built a two-part validation and monitoring system safeguarding **9,000+** application's compliance evidence package, cutting urgent audit-request response time by **87%** (4+ hours to under 30 minutes). (Python, SQL, Power Automate)
- Developed a ServiceNow onboarding automation script that auto-provisions and updates trackers with unique configurations, reducing per-application update time by **85–90%** (5 min to 30–45 sec) across hundreds of application control combinations. (Python, ServiceNow API)

Kii Health

Jan. – Apr. 2025

Software Developer Intern

Markham, ON (Remote)

- Resolved **50%+** security vulnerabilities in a mental health evaluation web application by auditing deprecated dependencies, improving system security and compliance with modern standards. (TypeScript, MongoDB)
- Validated end-to-end data flow by reviewing and verifying **100+** user records across frontend and backend systems, improving UI reliability and reducing data inconsistencies by **30%**. (TypeScript, Jira)

Raptor Integration Inc.

Sep. 2023 – Apr. 2024

Software Developer Co-op

Salmon Arm, BC

- Led a team to identify and resolve **40+** critical pre-production bugs, subsequently creating comprehensive end-to-end testing documentation that continues to support future maintenance and onboarding. (C#, JavaScript, Wrike)
- Increased Raptor software configuration efficiency by **25%** by building an internal tool that allows operators to tune, compare, and validate site-specific configuration across **10+** sawmill sites before deployments. (C#, XAML)

RELEVANT PROJECTS

[Financial Fraud Detector](#) | Python, Panda, Numpy, Matplotlib, Scikit-learn

Dec. 2025

- Built a **ML component** as real-time fraud detection system to integrate with any banking app. Designed **system integrated pipeline, handled heavy class imbalance with sampling techniques** to improve prediction stability.
- Implemented a **Super Learner ensemble** using 4-fold cross-validation and added Isolation Forest for unseen fraud types, achieving **91% AUC-ROC** and **83% average precision** on an imbalanced dataset.

[KCURR](#) | C#, ASP.NET, React.js, TypeScript, Node.js, Docker, Azure, Postman

Sep. 2024

- Built a full-stack, near-real-time currency monitoring app with live rate updates and user-defined watchlists.
- Applied **MVC architecture** and **SOLID principles** to restructure the backend, reducing debugging time by **20%** and improving code clarity; added **xUnit tests** to raise reliability, and improved system responsiveness by implementing a caching mechanism and lazy loading, cutting API calls and average response latency by **50%**.

TECHNICAL SKILLS

Languages: C#, Python, Java, JavaScript/TypeScript, C++, PHP, SQL, HTML/CSS, XAML (WPF), Bash

Frameworks: Spring Boot, React.js, Node.js, ASP.NET, Laravel, Blade, xUnit, Three.js

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Development Concepts: Software Development Lifecycle, RESTful API Design & Integration, Database Management

DevOps & Tools: Git, CI/CD Pipelines, Docker, AWS(S3, Lambda, API Gateway, Security Groups, IAM), Microsoft SQL Server, Oracle, MongoDB, Power Automate

Security Knowledge: Wireshark, Metasploit, Burp Suite, OWASP Top 10, TLS/SSL, SSH, Cryptography & Hashing (SHA, MD5, bcrypt), OAuth2, Access-control system, Hadoop, Spark, ISO 27001/2, NIST, CIS, Mitre ATT&CK
